6/28/2002

Service HoseSafety Compound KettleFurnace-Plumbers Tank Mount**Barnard #1650304**Lead Scraper

The lead scraper, also known as a shave hook is equipped with easily interchangeable blades.

Blade Types include:

Type A.-Oval, Type B-Half Oval,
Type C- Triangle.

**Barnard #13904**File Cards

The wood handled d file card is used to prepare lead cable sheaths for soldering. it can also be used to clean files.

**Barnard #2080PY**Soldering Copper with Handle

Sizes available: 2,2-
1/2,3,4,5,6 inches.

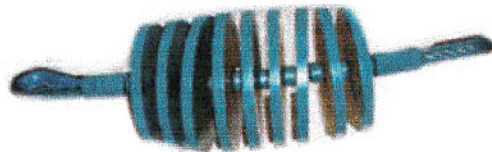

Barnard #1160B281217**Catchpan**

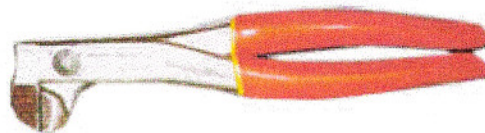

The 12 x 17 inch catch pan is perfect for Collecting oil, solder, wax drippings. The pan has folding loop handles on each end.

Barnard #17310488**Flexible Steel Mandrel**

Used in extremely bent conduits, the Hardened steel disks of graduated sizes are strung on flexible steel cable. This mandrel efficiently clears obstructions from the conduit. Sizes: 1-3/4 inches to 6 inches in 1/4 inch increments.

Barnard #2331US1**Utility Splicing Wrench**

This alloy steel drop forged wrench with dielectric handles provides powerful hand leverage for splicing. This quick action adjustable wrench, also known as an Eagle Beak, is necessity

for every linemans and splicers tool kit.

Barnard #16401**Wood Lead Dresser**

Made from selected hardwood the wood lead dresser is ideal for forming and dressing cable.

Barnard #1732**Snakes Tail Mandrel**

The Snake's tail mandrel follows the snake through conduit to insure the clear passage of wire or cable.

Available for conduit sizes: 1-1/4, 1-1/2, 2, 3, 4, 5, 6 inches.

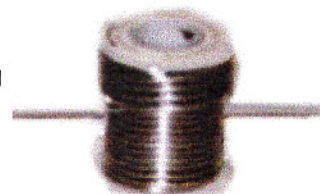

Barnard #1281150**Swinglinks**

Use for pulling wire through conduit and wherever you need a fast simple connector not subject to heavy

Barnard #207012**Solder**

The bar solder and wire solder are made of highly refined virgin base metals. Each one pound bar and spool is clearly marked indicating its tin: lead content. Wire solder is Available in 1/8 or 1/16 diameters.

Barnard #22700**Wiping Cloths**

The wiping cloths, made of top Quality ticking are designed to perfectly wipe joints on lead sheathed cable splices. These ready to use cloths require no breaking in.

Available in flat or formed.
Sizes: 2 x 2 to 12 x 12-Flat
2 x 2 to 4x 4 Formed

Barnard #17601**Cable Splicers Mirror**

When space constraints limit routine examination of the opposite end of a spliced or wiped joint, the plated splicing mirror in its protective 3-1/2 x 3-1/2 inch rubber frame does the trick.

Barnard #14501**Flux**

Stearine Sticks: The wickless candle form is easily applied by rubbing. NOKORODE PASTE: Applied with an acid brush, this flux comes in paste form.

**Barnard #1980398****Solder Pot**

The cast iron pot equipped with a free swinging handle fits inside the furnace guard. Sizes: 5,6,7,8,9 10 inches.

**Barnard #1990312****Balanced Solder Ladle**

The balanced solder ladle, with its forged steel double lipped bowl and wooden handle, pours a steady stream of molten solder with ease and precision.

**Barnard #18634****Torch**

Designed for use with liquid propane gas, the torch attaches directly to the service hose.

6/28/2002

Complete line available.

Barnard #1910T

Temperometer

Exceptionally rugged yet lightweight, the temperormeter accurately registers the correct temperatures of molten solder, wax and other compounds. It is equipped with a large easy to read Dial and a convenient handle.

Barnard #1470678

Furnace Guard

A heavy gauge steel shield and a cast iron base assure its long life. The furnace guard fits on top of the furnace.

Barnard #1590S

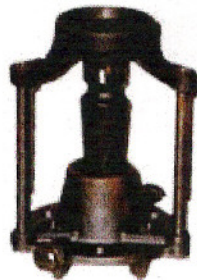

Service Hose

This hose, complete with fittings and a cylinder connector, withstands full pressures under severe conditions. Sizes 3, 6, 12, 24, 50 feet.

Barnard #12201**Safety Compound Kettle**

The double jacketed steel kettle, with all of its parts brazed, is scientifically designed to maintain a uniform heat throughout the compounds to be melted. It also has a double ring on its bail to raise or lower the kettle for aerial and manhole work.
Size: 5 quarts.

Barnard #14601200**Furnace-Plumbers Tank Mount**

The furnace attaches directly to a plumbers pot valve at the top of the cylinder to form a completely portable and convenient melting assembly.
